

MAGNAFIT™
Magnetic Door Casings

INSTALLS INSTANTLY

By using a patented magnetic fastening system, MagnaFit casings install instantly without tools, adhesives, or screws. Simply place the casing over a standard hollow metal frame and let the magnets do their work. No fuss, no mess, no noise. And the attachment is so secure a pry bar is required to remove.

FIRE SAFE

MagnaFit has been engineered to withstand some of the most rigorous fire safety demands and can be specified for door openings rated from 20 minutes up to 3 hours. As the only casing option for stairwells, exit doors, and many other doorways in multistory buildings, MagnaFit is the choice for fire safety.

DESIGNED TO ACCOMMODATE

MagnaFit is available with a unique channel system designed to accommodate irregular and uneven wall surfaces around doorways, making it ideal for renovations or other projects with non-standard wall surfaces. Inquire about the MagnaFit channel system, and ensure a flush fit every time.

FULLY CUSTOMIZABLE AND ENVIRONMENTALLY FRIENDLY

For those needing a one-of-a-kind look, MagnaFit can be fully customized. Our 7-head moulder allows us to produce an infinite variety of profiles, and our finishing booth can match or create any paint color or stain. MagnaFit is also available in an array of woods, including FSC certified material. Contact us to learn more about our custom woods, profiles, and finishes.
